This price list covers the complete range of Fort Doors garage doors, options and accessories. Prices shown exclude VAT and delivery.

GENERAL NOTES:

Delivery to site POA.

- Multiple doors and remote locations POA.
- All illustrations represent a 2134mm wide X 2134mm high door (7'0" x 7'0") and all sizes are listed width x height.
- Retractable up and over doors are supplied with MAXIPLUS retractable operating gear.
- Frame sizes do not include any fitting tolerances - this must be allowed for if required.
- The position of lock handles may vary dependent on door size.
- Side hinged doors are available as 50:50 opening or 1/3 : 2/3 opening.
- The door order size code should be used for internal dimensions of a timber frame. The size code has traditionally been used to order doors. This may not be the actual door size.

In the unlikely event of a warranty claim, please contact your dealer that installed your garage door and supply them details of the serial number on the side or back of the garage door.

Your dealer will supply further details of the claim along with proof of purchase to the warranty department at Fort Doors.

Warranty period

A warranty covering the safe and reliable operation of the Fort Doors garage door for a period of 10 years from the date of purchase is given to the original purchaser, this warranty is for help and advice on the safety and reliability of the product and identifying parts and consumables in the event of a failure.

Product Guarantee

The standard guarantee of 2 years is given to the holder of the product that covers all parts and the panel providing the serial number is readable, intact and in place. Factory applied paint finishes have 2 years on steel doors that have standard colours applied, special non-standard colours are excluded.

The product is given a 2-year warranty for the following item – springs; tracks; rollers; hinges and locking for normal use whereby normal use consists of no more than 5 operations (open/ close) per day. We recommend the product is inspected and serviced annually by a competent engineer from the garage door industry, the warranty for parts replaced by an engineer or for supply only is 6 months or for the remainder of the warranty period. All cables are excluded from the warranty given.

If warranty work is carried out the product guarantee does not extend past the anniversary of installation / supply date.

Requirements

Warranties are valid in the UK only for European countries contact your dealer.

The product must have been purchased through one of our authorised partners and a serial number and receipt of purchase provided.

The warranty only covers damage to the garage door in the unlikely event of a failure, no surrounding items are covered.

Performance

During the warranty period we will rectify defects to the Fort product that can be proven to be material or manufacturing faults. At our discretion we will either exchange; repair or reduce the price. We will not accept any costs for dismantling; installation or delivery.

Warranty exclusions.

Doors must be inspected on delivery and are only to be signed for once you are satisfied with the condition, please do not accept any item you are not satisfied with. You have 48 hours from receipt of the item to inform us of any issues. By installing the garage door, the customer acknowledges and accepts the condition of the door as it stands post-delivery, no claim for damage will be accepted once the item has been installed.

Improper transport; fitting and adjustment.

Repairs by non-qualified or non-competent individuals.

External influences such as fire, water, salt, alkaline solutions, acid, bird droppings or abnormal atmospheric pollution.

The use of non-Fort Doors parts without the approval of the manufacturer.

Damage caused in general use after delivery.

All cables have a limited warranty of 2 years for parts only, cables should be checked regularly and adjusted by a recognised installer, a list of service engineers is available from the Fort customer service department. Failure to inspect, adjust or replace damaged cables early can cause a terminal failure of the product and prevent entry into the garage.

Painted doors give an outstanding finish compared to hand painted doors however they can be scratched or chipped by everyday use, refer to the internal label for care and maintenance of your door, The paint finish is cosmetic and the front panel should be uniform when viewed from 3 meters distance, we offer a 2 year warranty against paint failure, minor blemishes in the finish are inevitable.

The rear of the door will not enjoy such a uniform finish by its nature and will have a different level of coating due to the manufacturing process however this does not affect the performance of the product and all doors are supplied galvanized and Painted or galvanized only giving outstanding external use.

Minor scratches or marks are not covered under the conditions of our warranty and should be repaired immediately to prevent corrosion and deterioration of the panel. Minor surface damage can easily be repaired using touch up sprays or paint sticks without invalidating the warranty.

Touch up paint stick are available upon request.

The rolling or pressing of steel panels during manufacturing may cause distortion in the steel and while every effort is made to keep this to a minimum, Inevitably some distortion will remain, The powder coating process may make this slight distortion more apparent, Especially under certain lighting conditions.

Doors fitted near the coast and inland estuaries are exempt from the paint finish warranty.

Additional information.

Doors are handmade, consequently, door dimensions will vary slightly. Please allow for a tolerance of $\pm 3-4$ mm.

It is a fundamental condition of this guarantee that the product has been installed, maintained, cleaned and serviced correctly and is used solely for which it was designed.

Incorrect installation, maintenance and service will invalidate the warranty.

The door must be kept in a clean condition and free from impact damage, any areas of paint damage must be dressed with touch up paint as soon as possible.

We strongly advise that you do not book an installer or remove your existing door until your goods have arrived and have been checked. We are not liable for any installation costs, consequential losses for time, travel costs, costs due to transport damage on arrival or compensation in any way. We require to be notified of any damaged goods within 48 hours of arrival.

Retractable & Canopy Technical

FRAMED RETRACTABLE DOORS ALL SIZES

- Frame size** All doors 50mm per side and 50mm cross bar.
- FOW/H** = Frame opening size between the frame inside edges and the threshold to the underside of the frame head from a visible point at the front of the door.
- DTW/H** = Drive through size, the clear opening to allow an object to pass through the space without being impeded by the gearing, seals or leaf. (size does not include handles on manual tracked doors).
- DTW** = Door size less 35mm per side.
- DTH** = Frame opening height less 116mm.
- OAF(W)** = Door and frame size combined.
- OAF(H)** = Door height plus 50mm frame.
- SR** = Side room - only important if frame is fitted behind the brickwork when 100mm per side is required (frame + brackets).
- BR** = 7ft high door 1.850m (from back of frame)
6'6" high 1.850m (from back of frame) (manual operation).
- HR** = 0mm
- Kick out** = Refers to the out swing of the door - maximum 1200mm.

Door Style	Open position	FO-SIZE	DT-WIDTH	DT-HEIGHT
Tracked Single 2020-on	Full open	2134 x 1981	2064	1865

Calculation = FO Width: Less arm width, 35mm per side = 70mm total.
FO Height: Less slam, less leaf depth, less tolerances = 116mm.

All sizes exclude fitting tolerances and these should be assessed on site depending on the application, a recommendation is 8-10mm per side.

Heights for up and over doors are adjustable depending on the opening position of the door leaf, the drive through can be increased or decreased depending on the final fixing position and the installer should assess the installation as claims after installation will not be accepted.

FRAMED CANOPY DOORS ALL SIZES

- Frame size** All doors 50mm per side and 50mm cross bar.
- FOW/H** = Frame opening size between the frame inside edges and the threshold to the underside of the frame head from a visible point at the front of the door.
- DTW/H** = Drive through size, the clear opening to allow an object to pass through the space without being impeded by the gearing, seals or leaf. (size does not include handles on manual canopy doors).
- DTW** = Door size less 15mm per side.
- DTH** = Frame opening height less 116mm.
- OAF(W)** = Door and frame size combined.
- OAF(H)** = Door height plus 50mm frame.
- SR** = Side room - only important if frame is fitted behind the brickwork when 100mm per side is required (frame + brackets).
- HR** = 0mm

Order Height

FOH	KU	KO	BR	
6'4"	1940	55	665	1280
6'6"	1980	55	705	1280
6'10"	2080	55	805	1280
7'	2135	55	860	1280

Door Style	Open position	FO-SIZE	DT-WIDTH	DT-HEIGHT
Canopy Single 2020-on	Full open	2134 x 1981	2104	1865

Calculation = FO Width: Less side seal width, 15mm per side = 30mm total.
FO Height: Less slam, less leaf depth, less tolerances = 116mm.

All sizes exclude fitting tolerances and these should be assessed on site depending on the application, a recommendation is 8-10mm per side.

Heights for up and over doors are adjustable depending on the opening position of the door leaf, the drive through can be increased or decreased depending on the final fixing position and the installer should assess the installation as claims after installation will not be accepted.

FRAMED SIDE HINGED DOORS ALL SIZES

- Frame size** All doors 50mm per side and 50mm cross bar.
- FOW/H** = Frame opening size between the frame inside edges and the threshold to the underside of the frame head from a visible point at the front of the door.
- DTW/H** = Drive through size, the clear opening to allow an object to pass through the space without being impeded by the seals or leaf.
- OAF(W)** = Door and frame size combined.
- OAF(H)** = Door height plus 50mm frame.
- SR** = Side room for Classic side hinged doors - only important if frame is fitted behind the brickwork when 100mm per side is required (frame + brackets). Pro versions require 60mm per side as you can only fit 10mm of the frame behind the opening.
- BR** = Back room - only important if the door is inward opening, as a guide allow half of the OAF(W).

Door Style	Open position	FO-SIZE	DT-WIDTH	DT-HEIGHT
Classic 2025-on	110 degrees	2134 x 1981	2034	1960
PRO 2025-on	110 degrees	2134 x 1981	2034	1965
PRO 20 2025-on	110 degrees	2134 x 1981	2034	1950
PRO Therma 2025-on	110 degrees	2134 x 1981	2070	1930

Calculation = FO Width: Less leaf widths = 100mm total.
Classic FO Height: Less slam strip = 21mm.

Calculation = FO Width: Less leaf widths = 100mm total.
PRO FO Height: Less slam strip = 16mm.

Calculation = FO Width: Less leaf widths = 100mm total.
PRO 20 FO Height: Less slam strip 16mm less threshold height 15mm = 31mm total.

Calculation = FO Width: Less leaf widths = 64mm total.
PRO Therma FO Height: Less slam strip 16mm less threshold height 35mm = 51mm total.

All sizes exclude fitting tolerances and these should be assessed on site depending on the application, a recommendation is 8-10mm per side.

Widths for side hinged doors are adjustable depending on the opening position of the door leaf, the drive through can be increased or decreased depending on the final fixing position and the installer should assess the installation as claims after installation will not be accepted.
